

CM IT Provider Customizer combines the tools for personalization of environment of a company, which provides its services to customers through the CUSTOMER MONITOR® system.

List of elements, which may be personalized: :

- http address, on which the CM Portal is available
(when you have your own CM Server, custom address is a matter of course)
- logos inside the CM Portal
- the logo and the name of your company inside emails generated from the CM
- logos in the About applications (WIN, MAC platform) (*)
- logo in the installation program C-MSetup.exe for Windows (*)
- logos, contacts and text on the login page (*)
- custom file archive accessible from the login page (*)
- a form about work done for the customer (adjustments are made on request)

(*) - to personalize the element, the service of custom http address to access the CM Portal is required

For more information, read [How CM works, section CM Personalization for you](#) [1]
