

One of many strengths of the solution CM is the possibility to maintain a lot of settings remotely. Among these is edition of scheduled tasks through CM Portal in the most common range. Creation of new tasks however, is so far available only by downloading the file with schedule and sending a new one with a new added task.

[Edit properties of scheduled tasks for several devices at once](#)

Search, view and edit tasks by computers

Go to *Admin zone -> C-Monitor client -> Schedules and task status*. Enter search data of a computer into the basic upper filter. After finding the computer, select *Show* and click on *Edit* for the required task. You'll see a form for adjustment of the most common parameters of scheduled tasks.

The screenshot shows the 'Admin zóna' (Admin zone) interface. The top navigation bar includes 'Admin zóna', 'Prehľadanie a Vyhodnotenie', and 'Customer Desk'. The user is logged in as 'Operátor: Testovací Operátor'. The main section is titled 'Rozvrhy a stav úloh' (Schedules and task status). Below this, there are search filters for 'Spoločnosť', 'servis', 'Počítač & Umiestnenie', 'molekula', 'Používateľ', and 'Operátor'. A table lists the tasks for the selected computer. The table has columns for 'X', 'ID', 'CM ID počítača', 'Meno počítača v sieť', 'Umiestnenie počítača', 'Používateľ', 'Spoločnosť', 'Verzia C-Monitora', 'Naposl. odosl. rozvrh z PC do CM', 'Posl. online spojenie s CM', and actions 'Pridať', 'Výzvať', and 'Zobraziť'. The 'Zobraziť' button is highlighted with a red box and an arrow.

Search and edit more tasks at once

At Admin zone -> C-Monitor client -> Schedules and task status, press the button **Extended filter**. There will be items added to your filter, to compose an extended filter for searching in scheduled tasks by several criteria. The filter can even be saved for a future use. After finding the tasks, select which do you want to edit and press the button *Edit selected*.

Image: Použitie rozšíreného filtra pre nájdenie úloh na spoločnú editáciu

Because not all of the options for scheduled tasks are implemented on CM Portal, it's necessary to make an adjustment directly through the configuration file with scheduled tasks (ScheduleList.swl). This file is kept on the server and it is always up to date. Download this file to your computer, make the adjustment through you Scheduler (C-Monitor must be installed) and after the edit upload it back to the server. The procedure is described on the images below.

Add a scheduled task for several computers at once

It may occur you have a new task, which you want to get into more computers at once. In CM there's a simple solution for that. Create a file with the given task in your Scheduler and save it under your chosen name with .sdl extension. Go to CM Portal, into Schedules and task status, using the upper filter search for the computers, on which you want to add the task and press the button **"Add a task for selected"** to deliver the file at the same time.

If you need to send another file along with the scheduled task, use the function Update C-Monitor client. Through the update package you may also add/change a scheduled task.

(if you need any help, feel free to contact us, we'll send you the procedure if it's not already on this web)

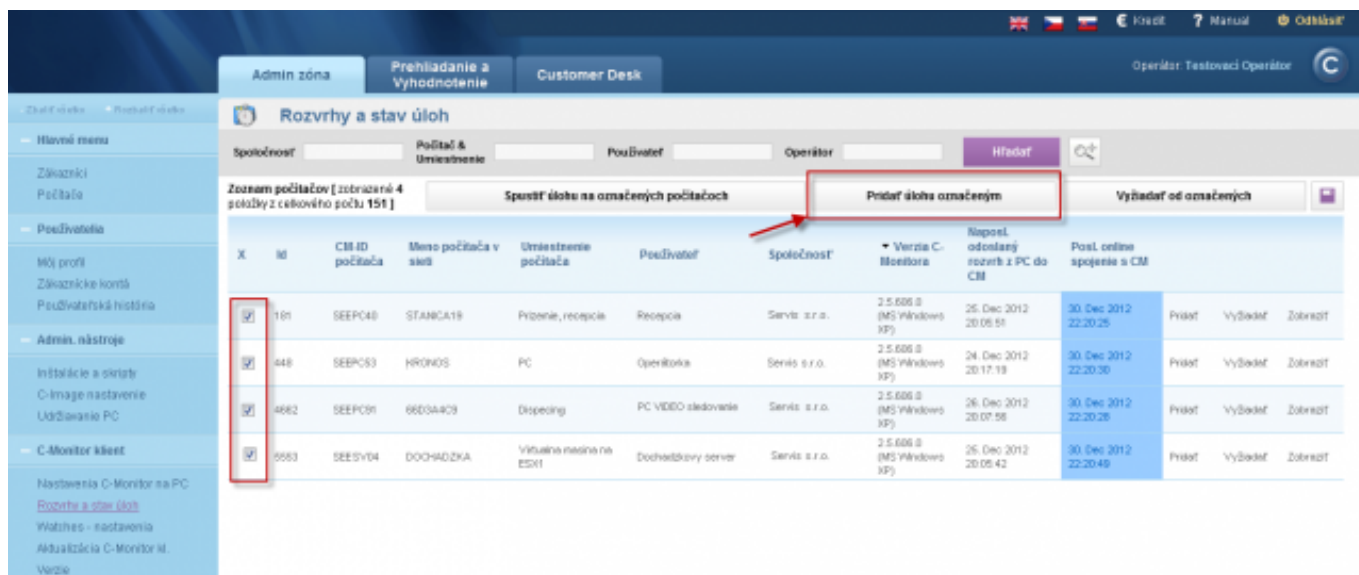

Image: Pridanie úlohy z vášho .sdl súboru na viac PC naraz

Edit properties of scheduled tasks for several devices at once

In case you need to edit more parameters and settings of a task on several computers at once, do so in the section *Admin zone -> C-Monitor client -> Schedules and task status*. First, click on the magnifier picture, which is next to the upper filter, as displayed on the following image, the magnifier is marked with number 1. Then choose a task property in the row condition, preferably a

one that's mutual for all tasks, which settings do you wish to change, and press the button Search. You'll get a view of a list of tasks, which meet the given filter, so select those you wish to edit. On the following image are all tasks selected (no.4). After the selection, press the button *Edit selected*, as you can see on the image (no.5).

The screenshot shows the 'Rozvrhy a stav úloh' (Schedules and Task Status) page in the Customer Monitor application. The page has a top navigation bar with 'Admin zóna', 'Prehľadanie a Vyhodnotenie', 'Customer Desk', and 'Communicator' tabs. Below the navigation bar, there are filters for 'Spoločnosť' (Company), 'Počítač & Umiestnenie' (Computer & Location), 'Posl. stav' (Last status), and 'Operátor' (Operator). A search bar with a magnifying glass icon is labeled '1.'. Below the filters, there is a 'Filter' section with a dropdown menu labeled 'Podmienka 1' (Condition 1) and a text input field labeled 'Task Name'. The dropdown menu is open, showing 'Naplnenie úlohy' (Task completion) and 'Task Name'. The text input field contains 'obrazky' (images) and is labeled '3.'. Below the filter section, there is a table titled 'Zoznam úloh [zobrazených 44 položiek z celkového počtu 44]' (List of tasks [44 items shown out of a total of 44]). The table has columns: 'X' (checkbox), 'CH-ID počítača' (Computer CH-ID), 'Spoločnosť' (Company), 'Stav' (Status), 'Názov úlohy' (Task name), 'Príkazový riadok' (Command line), 'Perióda' (Period), 'Prvé nastavené spustenie úlohy' (First scheduled task execution), and 'Posl. nastavené spustenie úlohy' (Last scheduled task execution). The table contains 44 rows of tasks. A red box labeled '4.' points to the 'X' checkbox column, where all tasks are selected. A red box labeled '5.' points to the 'Editovať označené' (Edit selected) button. The table shows 44 tasks in total, with 44 displayed.

Image: Výber rovnakých úloh pomocou horného filtra pre hromadnú editáciu úlohy

In the next window you may change settings for all selected tasks at the same time. The following image shows which task parameters can be changed collectively. After the change of settings, press the button *Update on computers*. The update will then proceed automatically.

The screenshot displays the 'Rozvrhy a stav úloh' (Schedules and Task Status) page in the Customer Monitor application. The interface is divided into several sections for configuring scheduled tasks. At the top, there's a header with navigation tabs like 'Admin zóna', 'Prehľadanie a Vyhodnotenie', 'Customer Desk', and 'Communicator'. Below this, a search bar and filter options are present. The main content area shows a table of tasks, with one task selected. Below the table, there are four main configuration sections: 'Spoločné nastavenia' (Common settings), 'Spúšťať podľa dátumu a času' (Run by date and time), 'Spúšťať pri udalosti' (Run on event), and 'Spúšťať pod účtom' (Run as user). The 'Run as user' section is highlighted with a red box, and a red arrow points to the 'Aktualizovať na počítačoch' (Update on computers) button at the bottom right of the configuration area.
